## Experience

**Senior Software Engineer** | *Lumen Technologies, Inc.*

*Nov 2022-Oct 2023*

Tech: *React, Typescript, Flask, SQLAlchemy, Python, Docker, Azure, Google Maps API*

- Led our UI/UX team in **deploying a customer ready React App in under 8 weeks**
- Single-handedly designed and implemented an API/data-model servicing multiple teams and apps
- Collaborated with consultants in project planning and SCRUM/Agile planning
- Built an application which can **cleanse tens of thousands of data points** in support of company-wide data migration

**Software Integration Developer** | *Bonfire Engineering & Construction*

*Jan 2022-Nov 2022*

Tech: *Flask, Python, Docker, Azure, ArcGIS, MySQL*

- Built software **analyzing 12 new markets and offers from 4 major competitors**
- Deployed the organizations first API, integrated with internal and external datasets and UI
- **Mapped 16 Demographic Datasets across 24 geographies** in ESRI ArcGIS

**Full Stack Developer** | *Theorem LTS*

*Mar 2020 - Dec 2021*

Tech: *React, Typescript, Express, GraphQL*

- Brought **40+ end-to-end UI features to production**
- **Integrated buyer and seller platforms with Stripe**
- **Reduced the size of our codebase by 30%** by combining client-side in a Node package
- Helped **increase revenue by +18%** through product development

**Audio Engineer** | *Contract & Freelance*

*Jan 2016-Dec 2021*

- Led and mentored teams on systems design, recording technology, and production
- Solved complex problems under tight deadlines in high-pressure environments
- Designed and maintained systems for nationally ranked music venues

---

## Skills

- |                                   |                                     |
